

Budgeting & Credit Education P2

December 20, 2012

CCCF presented part two of their educational seminars: Understanding Credit. Alex was pleased to teach attendees all about credit. The attendees explored the different types of credit reports, and Alex provided supplementary handouts for attendees to develop a better understanding of credit reports and how to read them.

During the seminar, Alex also discussed credit terminology, median FICO scores by state, and gave suggestions for establishing good credit.
